CRITERIA FOR TERMINOLOGY SELECTION FOR THE LSP DICTIONARY

Abstract

The article deals with the criteria for selection of lexical units for the LSP dictionary as well as the criteria for their integration into the LSP dictionary. The author analyzes the main groups of sources of LSP dictionaries and specifies the main requirements for their quantity and quality. The principles of terminology selection, shared both in the Russian and foreign terminography, are investigated. The author also pays attention to the impact of author's paradigm on the selection of terminology.

Keywords: LSP dictionary, terminography, terminology selection, terminology sources.
